Feb 2025 – Apr 2025

- **Infrastructure & Security:** Configured FortiGate/Sangfor firewalls and Synology NAS. Upgraded core switches and wireless APs while resolving DHCP conflicts to improve network reliability.
- **Asset Management:** Reconciled legacy records to migrate and operationalize a new inventory tracking system.
- **End-User Support and Operations:** Delivered technical support for 50+ workstations, automating software deployments to reduce downtime. Resolved weekly tickets with high user satisfaction ratings.

TECHNICAL PROJECTS

A. Web Application for a Private Motor Vehicle Inspection Center

Node.js · Express.js · TypeScript · Supabase · PostgreSQL · HashiCorp Vault · MinIO · EJS

- Automated manual workflows using Node.js, Express, and Supabase.
- Implemented SHA-512 digital signatures and 2FA (TOTP) for record integrity. Also, secured operational data using HashiCorp Vault (KMS) and MinIO encryption.

B. Restaurant Inventory and POS Management System

Node.js · Express.js · JavaScript · Supabase · PostgreSQL · EJS

- Designed modules for stock management and role-based user permissions to improve security.
- Integrated advanced reporting functionality to provide actionable insights for decision-making.

C. Simulated Campus Network Configuration

Cisco

- Configured and managed a simulated campus network for three separate sites using Cisco Packet Tracer, demonstrating practical experience with wide area network (WAN) and virtual private network (VPN) connectivity.
- Implemented and maintained critical network services, including VLANs, Access Control Lists (ACLs), and DHCP, ensuring network segmentation, security, and efficient IP address allocation.
